

June 16, 2008

Dear Valued Customer,

On May 21, 2008, Chemical Lime introduced its Energy Surcharge Program in response to unprecedented increases of Chemical Lime's production costs. Chemical Lime has committed to providing its customers 15 days notice prior to the quarterly change in the Energy Surcharge. Therefore, we are delivering this notice so that you will be able to adequately prepare for any adjustments to your own costs for this upcoming quarter.

The price for West Texas Intermediate Crude Oil for the month of May has now been posted, and the Energy Surcharge for the Third Quarter (July, August and September) has been calculated. The Energy Surcharge for the Third Quarter of 2008 will be \$8.30 per ton of product.

For your convenience, the initial announcement related to the Energy Surcharge Program and the calculation of the Energy Surcharge may be viewed on Chemical Lime's website at www.chemicallime.com.

We appreciate your cooperation during this challenging time. Chemical Lime sincerely appreciates the mutually beneficial relationship that it has enjoyed with you and looks forward to the continuance of that relationship in the future.

Sincerely,

Mike Eliassen
Senior Vice-President, Sales
Chemical Lime Company
